

QA Report 08: Partner Portal (Ubn-API-Portal-Frontend)

Project: OneCluster UBN Platform **Report ID:** QA-RPT-008 **Sprint Period:** March 31 - April 9, 2026 **Prepared By:** QA Team **Date:** April 9, 2026 **Status:** PASS

1. Executive Summary

This report covers quality assurance testing for the Partner Portal (Ubn-API-Portal-Frontend), the external-facing web application used by partner organizations to register, complete onboarding, manage API credentials, and monitor their API usage on the UBN platform.

This sprint saw the **largest change set across all repositories** with 76 commits merged. Major changes include a complete KYC page overhaul (266 lines changed), reworked assessment questionnaire steps, a redesigned dashboard overview, a new SLA page, and a new profile underlay component. All 58 Playwright UI test cases passed against the dev-ubn-ui.onecluster.co environment. All authentication pages render correctly, navigation works end-to-end, and responsive layouts function properly on mobile and tablet viewports. No blocking issues were identified.

2. Scope

Components Under Test

Component	Description
Registration	New partner organization sign-up
Login	Partner user authentication
OTP Verification	One-time password email verification
Forgot Password	Password reset request flow
Reset Password	Password reset completion flow
KYC Onboarding Wizard	4-step Know-Your-Customer onboarding process
Assessment Questionnaire	6-step partner readiness assessment
Dashboard Overview	Partner home dashboard with key metrics
API Dashboard	API usage analytics and monitoring
Product Catalog	Available API products browsing
API Credentials	API key and secret management
Settings	Partner organization settings and preferences
SLA Page	Service Level Agreement monitoring (NEW)
Profile Underlay	Profile management slide-out panel (NEW)

KYC Onboarding Wizard Steps

Step	Content
Step 1 — Business Registration	Company name, RC number, incorporation date, business type
Step 2 — Documents	CAC certificate, memorandum of association, utility bill uploads

Step 3 — Representatives	Director/shareholder details, BVN verification, ID uploads
Step 4 — Review & Submit	Summary review of all entered data before submission

Assessment Questionnaire Steps

Step	Content
Step 1 — Business Overview	Industry sector, annual revenue, customer base size
Step 2 — Technical Readiness	Development team size, infrastructure, security practices
Step 3 — Compliance	Data protection policies, regulatory compliance status
Step 4 — Use Case	Intended API products, expected volumes, integration timeline
Step 5 — Security Assessment	Penetration testing, vulnerability management, incident response
Step 6 — Review & Submit	Final review and submission

Test Environment

Property	Value
URL	https://dev-ubn-ui.onecluster.co
Test Framework	Playwright
Browser Matrix	Chromium (primary), Firefox, WebKit
Viewport Testing	Desktop (1920x1080), Tablet (768x1024), Mobile (375x812)

3. Changes This Sprint

Total Commits: 76 (largest change set this sprint)

Change	Description	Impact
KYC page overhaul	Complete redesign and restructuring of the KYC onboarding wizard (266 lines changed)	High — core onboarding flow rewritten
Assessment steps reworked	Questionnaire steps reorganized with improved validation and progress tracking	High — affects partner onboarding journey
Dashboard overview redesigned	New layout with updated metric cards, charts, and activity feed	Medium — visual and UX improvements
SLA page added	New page displaying SLA metrics, uptime targets, and compliance status	Medium — new feature for partners
Profile underlay component	Slide-out panel for profile viewing and editing from any page	Low — UX enhancement
Navigation restructuring	Sidebar updated to accommodate SLA page and new sections	Low — layout change
Responsive layout fixes	Mobile and tablet viewport adjustments across multiple pages	Medium — cross-device compatibility

4. Test Results

4.1 Playwright UI Tests

Environment: dev-ubn-ui.onecluster.co **Result:** 58/58 PASS

Authentication Tests

Test ID	Test Case	Expected	Actual	Status	Notes
PP-001	Registration page renders	Form with org name, email, password	Form rendered correctly	PASS	All fields present with validation
PP-002	Valid registration submission	Success message, redirect to OTP	Registration created, OTP page shown	PASS	Confirmation email triggered
PP-003	Duplicate email registration	Error: email already registered	Error displayed	PASS	No information leakage about existing accounts
PP-004	Login page renders	Email and password fields	Form rendered	PASS	—
PP-005	Valid login	Redirect to dashboard	Dashboard loaded	PASS	Token stored securely
PP-006	Invalid login credentials	Error message	"Invalid credentials" shown	PASS	Generic error, no leakage
PP-007	OTP verification page renders	6-digit code input	OTP input displayed	PASS	Auto-focus on first digit
PP-008	Valid OTP submission	Account verified, redirect to login	Verification successful	PASS	—
PP-009	Invalid OTP rejection	Error, retry allowed	Error shown	PASS	Rate limited after 5 attempts
PP-010	OTP resend functionality	New OTP sent, cooldown timer	OTP resent, 60s cooldown shown	PASS	—
PP-011	Forgot password page renders	Email input field	Form rendered	PASS	—
PP-012	Forgot password submission	Success message (regardless of email existence)	Generic success shown	PASS	No email enumeration
PP-013	Reset password page renders	New password + confirm fields	Form rendered	PASS	Via token in URL
PP-014	Valid password reset	Password updated, redirect to login	Reset successful	PASS	Old sessions invalidated
PP-015	Password reset — weak password	Validation error	Strength requirements shown	PASS	Min 8 chars, uppercase, number, special

KYC Onboarding Wizard Tests

Test ID	Test Case	Expected	Actual	Status	Notes
PP-016	KYC wizard — Step 1 renders	Business registration form	Form displayed with all fields	PASS	Overhauled layout this sprint
PP-017	KYC wizard — Step 1 validation	Required fields enforced	Validation errors on empty submit	PASS	RC number format validated
PP-018	KYC wizard — Step 1 completion	Advance to Step 2	Step 2 loaded	PASS	Progress bar updated
PP-019	KYC wizard — Step 2 renders	Document upload interface	Upload zones displayed	PASS	Drag-and-drop supported
PP-020	KYC wizard — Step 2 file upload	File accepted, preview shown	Upload successful with preview	PASS	PDF and image formats
PP-021	KYC wizard — Step 2 file size limit	Reject files over 5MB	Error for oversized files	PASS	Clear error message
PP-022	KYC wizard — Step 3 renders	Representative details form	Form with director/shareholder fields	PASS	—
PP-023	KYC wizard — Step 3 BVN field	11-digit BVN input	BVN field with format validation	PASS	Numeric only, exact length
PP-024	KYC wizard — Step 4 review	Summary of all entered data	All steps data displayed	PASS	Editable via "Back" navigation
PP-025	KYC wizard — submission	Application submitted, confirmation shown	Submission successful	PASS	Status set to "Pending Review"
PP-026	KYC wizard — progress persistence	Partially completed wizard saved	Data retained on page reload	PASS	Auto-save on step transition
PP-027	KYC wizard — back navigation	Previous step loaded with data	Data preserved	PASS	No data loss on back navigation

Assessment Questionnaire Tests

Test ID	Test Case	Expected	Actual	Status	Notes
PP-028	Assessment — Step 1 renders	Business overview form	Form displayed	PASS	Reworked layout this sprint
PP-029	Assessment — Step 2 renders	Technical readiness form	Form displayed	PASS	—
PP-030	Assessment — Step 3 renders	Compliance questions	Form displayed	PASS	—
PP-031	Assessment — Step 4 renders	Use case details	Form displayed	PASS	—
PP-032	Assessment — Step 5 renders	Security assessment	Form displayed	PASS	—

PP-033	Assessment — Step 6 review	Full summary before submission	All data summarized	PASS	—
PP-034	Assessment — submission	Questionnaire submitted	Submission confirmed	PASS	—
PP-035	Assessment — progress tracking	Step indicator shows current position	Progress bar accurate	PASS	Reworked progress component
PP-036	Assessment — validation per step	Required fields enforced on each step	Validation errors shown	PASS	Cannot skip steps

Dashboard & Feature Tests

Test ID	Test Case	Expected	Actual	Status	Notes
PP-037	Dashboard overview renders	Metric cards, charts, activity feed	Dashboard displayed	PASS	Redesigned layout this sprint
PP-038	Dashboard — API call volume chart	Usage chart with date range	Chart rendered with data	PASS	Interactive date picker
PP-039	Dashboard — quick action cards	Links to common actions	Cards clickable, navigate correctly	PASS	—
PP-040	API Dashboard renders	Detailed API analytics	Analytics page loaded	PASS	—
PP-041	API Dashboard — per-product metrics	Breakdown by API product	Metrics per product shown	PASS	—
PP-042	Product Catalog renders	Available API products listing	Products displayed	PASS	Cards with descriptions
PP-043	Product Catalog — product detail	Product documentation and specs	Detail page loaded	PASS	—
PP-044	API Credentials page renders	API key and secret display	Credentials shown (masked)	PASS	Copy-to-clipboard working
PP-045	API Credentials — regenerate key	New key generated, old invalidated	Key regenerated	PASS	Confirmation dialog shown
PP-046	Settings page renders	Organization settings form	Settings loaded	PASS	—
PP-047	Settings — update organization name	Name updated	Change saved	PASS	—
PP-048	SLA page renders	SLA metrics and targets	Page displayed with metrics	PASS	NEW feature this sprint
PP-049	SLA page — uptime display	Uptime percentage shown	Percentage rendered	PASS	—
PP-050	Profile underlay opens	Slide-out panel from avatar click	Panel slides in from right	PASS	NEW component this sprint

PP-051	Profile underlay — edit profile	Profile fields editable	Changes saved	PASS	—
--------	---------------------------------	-------------------------	---------------	------	---

Responsive & Navigation Tests

Test ID	Test Case	Expected	Actual	Status	Notes
PP-052	Mobile viewport — login page	Responsive layout, no horizontal scroll	Properly formatted	PASS	375x812 viewport
PP-053	Mobile viewport — dashboard	Cards stack vertically	Responsive grid applied	PASS	—
PP-054	Mobile viewport — KYC wizard	Form fields full-width	Wizard usable on mobile	PASS	Step navigation accessible
PP-055	Tablet viewport — dashboard	2-column grid layout	Layout correct	PASS	768x1024 viewport
PP-056	Tablet viewport — product catalog	Cards in 2-column grid	Layout correct	PASS	—
PP-057	Navigation — sidebar links	All links navigate to correct pages	All routes working	PASS	No broken links
PP-058	Navigation — breadcrumbs	Breadcrumb trail accurate	Breadcrumbs correct	PASS	Clickable parent crumbs

5. Issues Found

No blocking or critical issues were identified during this testing cycle. The Partner Portal is in a healthy state with all 58 test cases passing.

Minor Observations (Not Tracked as Issues)

Observation	Description	Recommendation
KYC wizard load time	Step transitions take 800-1200ms due to auto-save API calls	Consider optimistic UI updates with background saves
Assessment form labels	Some labels truncated on smaller mobile viewports (320px)	Not a supported viewport, but consider min-width CSS
Dashboard chart rendering	Chart library (Recharts) briefly shows empty state before data loads	Add skeleton loader to prevent layout shift

6. Recommendations

- KYC Onboarding Performance:** The overhauled KYC wizard is functionally correct, but step transitions could be faster. Implement optimistic updates where form data is immediately displayed in the next step while the save request completes in the background.
- End-to-End Onboarding Flow:** Create a Playwright test that covers the full journey: Registration -> OTP -> Login -> KYC Wizard (all 4 steps) -> Assessment (all 6 steps) -> Dashboard. This would validate the complete partner onboarding experience as a single workflow.

3. **Accessibility Testing:** With 76 commits and significant UI changes, conduct an accessibility audit (WCAG 2.1 AA) focusing on the new KYC wizard, assessment questionnaire, and dashboard overview. Check keyboard navigation, screen reader compatibility, and color contrast.
4. **Performance Baseline:** Establish Lighthouse performance baselines for key pages (Dashboard, KYC Wizard, Product Catalog) now that the major redesign is complete. Track scores across future sprints.
5. **SLA Page Data Source:** Verify that the new SLA page pulls data from actual monitoring metrics rather than static values. Ensure the page accurately reflects real uptime data once production monitoring is connected.
