

Defect Report / Bug Log — Project Pegasus

Project: Project Pegasus BaaS | **Sprint:** Sprint 3 **Date:** 2026-04-09 | **Prepared By:** QA Team **Total Defects:** 15 | **Critical:** 2 | **High:** 2 | **Medium:** 7 | **Low:** 4

1. Defect Summary Dashboard

Priority	Open	In Progress	Resolved	Closed	Total
Critical (P0)	2	0	0	0	2
High (P1)	2	0	0	0	2
Medium (P2)	7	0	0	0	7
Low (P3)	4	0	0	0	4
Total	15	0	0	0	15

2. Defect Log

CRITICAL (P0) — Blocks Testing

Bug ID	Title	Service	Found Date	Status	Assigned To	Description	Steps to Reproduce
PEG-375	Dev Partner Gateway returning 502	Ubn-Partner-Gateway	2026-04-06	OPEN	DevOps	All partner API traffic blocked in dev environment. Cloudflare returns HTML 502 error page.	1. curl https://dev-api-partner.onecluster.co/health
PEG-376	All 13 banking microservices unreachable in dev	Infrastructure	2026-04-06	OPEN	DevOps	Banking API, Accounts, Payments, Collections, KYC, Wallet, Customer Service, Webhook Dispatcher, 3rd Party Integration all return HTTP 000.	1. curl https://dev-banking.onecluster.co/health

HIGH (P1) — Security Issues

Bug ID	Title	Service	Found Date	Status	Description	Impact	Recommendation
--------	-------	---------	------------	--------	-------------	--------	----------------

PEG-377	Missing security headers on Admin Portal	Ubn-API-Portal-Admin	2026-04-06	OPEN	All 6 standard security headers missing (X-Frame-Options, X-Content-Type-Options, Strict-Transport-Security, CSP, X-XSS-Protection, Referrer-Policy)	Vulnerable to XSS, clickjacking, MIME sniffing attacks. Admin portal handles KYB approvals and user management.	Add headers in next.config.js or Cloudflare Page Rules
PEG-378	API catalog publicly accessible without authentication	Ubn-Admin-Gateway	2026-04-06	OPEN	GET /api/catalog/products returns full product list (names, descriptions, subscriber counts, pricing models) without any auth token.	Business-sensitive data exposed. Competitive intelligence risk.	Add auth middleware to /api/catalog/* route in ocelot.json

MEDIUM (P2) — Functional Issues

Bug ID	Title	Service	Found Date	Status	Description	Steps to Reproduce
PEG-379	Login returns HTTP 200 for failed authentication	Ubn-User-Management	2026-04-06	OPEN	POST /api/Auth/login with invalid credentials returns 200 with isSuccess:false instead of 401	POST dev-api.onecluster.cc wrong password
PEG-380	mTLS enforced on payment routes in sandbox	Ubn-Partner-Gateway	2026-04-06	OPEN	All /api/v1/payments/* routes require mTLS client certificate even with sandbox key (ubn_sb_*). Prevents sandbox payment testing.	POST /api/v1/pay demo key
PEG-381	Sandbox mock responses take 27-30 seconds	Ubn-Partner-Gateway	2026-04-06	OPEN	Static sandbox mock responses should return in <100ms but take 27-30s. Suspected cause: rate limiting middleware hitting slow/unreachable Redis before sandbox intercept.	GET /api/v1/acco demo key
PEG-382	/api/Profile/GetAllRoles returns 404	Ubn-User-Management	2026-04-06	OPEN	Endpoint returns 404 on both direct UMS access and via Admin Gateway. Admin Portal RBAC page depends on this endpoint.	GET dev-api.onecluster.cc
PEG-383	Collections API field name mismatch	Ubn-Collections-API	2026-04-06	OPEN	POST /api/v1/collections/virtual-account returns virtualAccountNumber but spec	POST /api/v1/coll account

					says accountNumber. Prefix is SB not SB-.	
PEG-387	Inconsistent error formats between services	Multiple	2026-04-06	OPEN	Admin Auth uses simple {"message":"..."}, User Management uses RFC 7807 {type,title,status,detail,errors}. Platform standard is RFC 7807.	POST invalid req
PEG-384	KYC BVN response field name mismatch	Ubn-KYC-API	2026-04-06	OPEN	POST /api/v1/kyc/verify/bvn returns verificationStatus but spec says matchResult.	POST /api/v1/kyc

LOW (P3) — Cosmetic / Minor

Bug ID	Title	Service	Found Date	Status	Description
PEG-385	Admin Portal page title "Create Next App"	Ubn-API-Portal-Admin	2026-04-06	OPEN	Default Next.js title not customized. Should be "Pegasus Admin Portal".
PEG-386	404 sandbox endpoint returns empty body	Ubn-Partner-Gateway	2026-04-06	OPEN	Unknown sandbox endpoints return 404 with empty body instead of RFC 7807 JSON.
PEG-388	sendOtp aggressively rate-limited	Ubn-User-Management	2026-04-06	OPEN	POST /api/Auth/sendOtp returns 429 even on first call. May be Cloudflare WAF or overly aggressive app-level rate limiting.
PEG-389	Collections transactions double-nested	Ubn-Collections-API	2026-04-06	OPEN	Response nested at data.transactions instead of directly under data. Minor inconsistency with other APIs.

3. Defect Trend

Week	New	Resolved	Open
Apr 1–6	15	0	15
Apr 7–9	0	0	15

4. Defect Distribution by Service

Service	Critical	High	Medium	Low	Total
Infrastructure	1	0	0	0	1
Ubn-Partner-Gateway	1	0	2	1	4
Ubn-API-Portal-Admin	0	1	0	1	2
Ubn-Admin-Gateway	0	1	0	0	1
Ubn-User-Management	0	0	2	1	3
Ubn-Collections-API	0	0	1	1	2

Ubn-KYC-API	0	0	1	0	1
Multiple	0	0	1	0	1
