

Application Walkthrough — Project Pegasus BaaS Platform

Project: Pegasus BaaS Platform **Date:** 2026-04-09 **Environments:** Development **Partner Portal:** <https://dev-ubn-ui.onecluster.co> **Admin Portal:** <https://dev-admin.onecluster.co>

Part A: Partner Portal Walkthrough

URL: <https://dev-ubn-ui.onecluster.co>

1. Registration Flow

Entry Point: Navigate to `/` — automatically redirects to `/auth/login`

Step 1: Navigate to Sign Up

- From the login page, click the **"Sign Up"** link
- Redirects to `/auth/signup`

Step 2: Fill Registration Form

Field	Type	Details
First Name	Text input	Required
Last Name	Text input	Required
Email	Email input	Required, must be valid format
Phone	Phone input	Pre-filled with +234 country prefix (Nigeria)
Company Name	Text input	Required
Institution Type	Dropdown	Options: Fintech, Healthcare, Retail, Logistics, IT
Terms & Conditions	Checkbox	Must be checked to proceed

Step 3: OTP Verification

- On successful form submission, user is redirected to OTP verification screen
- 6 individual digit input boxes** displayed (auto-focus advances to next box)
- 172-second countdown timer** shown (approximately 3 minutes)
- Timer displays in `MM:SS` format, counting down
- "Resend OTP" link becomes active after timer expires
- User enters the 6-digit code received via email/SMS

Step 4: Completion

- After successful OTP verification, user is redirected to `/auth/login`
- Success toast message displayed confirming registration

2. Login Flow

URL: `/auth/login`

Form Fields:

- Email** — text input with email validation
- Password** — text input with show/hide password toggle (eye icon)

Authentication Process:

1. User submits email and password
2. On success, server returns JWT token
3. Frontend decodes JWT to extract:
 - `partnerId` — unique partner identifier
 - `organizationId` — associated organization
 - `isOnboardingComplete` — boolean flag

Post-Login Routing:

Condition	Redirect Target
<code>isOnboardingComplete === false</code>	<code>/dashboard/get-started</code> (6-step onboarding checklist)
<code>isOnboardingComplete === true</code>	<code>/dashboard/overview</code> (main dashboard)

3. Onboarding Wizard

URL: `/dashboard/get-started`

The onboarding wizard presents a **6-step checklist** with progress tracking. Each step shows a checkmark when completed.

Step 1: Create Account

- **Status:** Auto-completed on registration
- No user action required — marked as done immediately

Step 2: Create Organization Profile

- **URL:** `/dashboard` (company details section)
- Form fields for:
 - Company legal name
 - Trading name
 - Registration number (CAC)
 - Tax Identification Number (TIN)
 - Industry sector
 - Company address
 - Company website
 - Company size

Step 3: Complete Business KYC

- **URL:** `/dashboard/kyc`
- **4-step sub-wizard:**

Sub-Step	Description
1. Business Registration	CAC registration number, certificate upload, incorporation date
2. Document Uploads	Certificate of incorporation, memorandum & articles, board resolution, utility bill
3. Business Representatives	Director/shareholder details — name, BVN, ID document, proof of address
4. Review Summary	Read-only summary of all entered data, submit for review button

- After submission: KYB status changes to "Pending Review" — admin must approve

Step 4: Fill Compliance Questionnaire

- **URL:** `/dashboard/assessment`
- **6-step assessment:**

Step	Section	Content
1	Organization Profile	Company structure, regulatory licenses, AML/CFT policies
2	Data Protection	NDPR compliance, data processing agreements, breach notification procedures
3	Information Security	ISO 27001 status, encryption standards, access control mechanisms
4	Risk Management	Risk assessment methodology, business continuity plans
5	Incident Management	Incident response plan, escalation procedures, SLA commitments
6	Technical Compliance	API security practices, penetration testing frequency, vulnerability management

- Each section has a mix of dropdown selects, text areas, and file upload fields
- Progress saved automatically between sections

Step 5: Upload Signed SLA

- **URL:** /dashboard/sla
- Download SLA template (PDF)
- Upload signed SLA document (PDF/image)
- Admin reviews and countersigns

Step 6: Switch to Live

- **URL:** /dashboard/overview
- Toggle from Sandbox to Live environment
- Requires all previous steps to be completed and approved
- Live API credentials generated upon activation

4. Dashboard

4.1 Overview (/dashboard/overview)

Stats Cards (top row):

Card	Sample Value	Description
Total Transactions	₦25.9M	Monetary value of all transactions
Transaction Volume	234k	Count of transactions processed
Avg Latency	—	Average API response time

Charts:

- **Transaction Chart** — Line/bar chart showing transaction trends over time
- **Channel Breakdown** — Donut chart showing distribution across payment channels (e.g., NIP, USSD, Cards)

4.2 API Dashboard

- **Time Range Selector:** 7 days / 30 days / 90 days toggle
- **Request Volume Chart:** Bar chart showing daily API request counts
- **Per-Product Breakdown Table:**

Product	Requests	Success Rate	Avg Latency
Accounts API	—	—	—
Payments API	—	—	—
Collections API	—	—	—

KYC API	—	—	—
---------	---	---	---

4.3 Product Catalog

Tabs:

- **ALL PRODUCTS** — Full list of available API products
- **SUBSCRIBED** — Products the partner has access to

Request Access Flow:

1. Click "Request Access" on any unsubscribed product
2. Modal dialog appears with:
 - Product name and description (read-only)
 - Justification text area (**minimum 20 characters** required)
 - Submit button
3. Request goes to admin approval queue

4.4 Settings

Section	URL	Features
User Profile	/dashboard/settings/profile	Edit name, email, phone
Organization Profile	/dashboard/settings/organization	Edit company details
API Credentials	/dashboard/settings/credentials	Generate new API keys, revoke existing keys, view key history
Security	/dashboard/settings/security	Change password with strength meter (weak/fair/strong/very strong), 2FA setup
Team Members	/dashboard/settings/team	Invite team members, assign roles, remove members
Audit Trail	/dashboard/settings/audit	Chronological log of all actions — login, key generation, settings changes

Part B: Admin Portal Walkthrough

URL: <https://dev-admin.onecluster.co>

1. Login

Entry Point: Navigate to `/` — automatically redirects to `/Auth/Login`

Branding:

- Page title: **"Pegasus Vendor Management Admin"**
- UBN logo displayed prominently

Login Form:

- **Email** — text input, required
- **Password** — text input, minimum 6 characters, show/hide toggle (eye icon)
- "Forgot Password?" link

MFA Flow:

1. Submit email + password
2. On success → redirected to `/Auth/Token`

- 3. **MFA token entry** — single text input field (6 characters)
- 4. Token sent to admin's registered email/authenticator
- 5. On token success → redirected to `/Dashboard`

2. Dashboard

URL: `/Dashboard`

System Metrics (top cards):

Metric	Description
System Uptime	Percentage uptime for the platform
Avg Latency	Average response time across all APIs
Traffic	Total API requests in current period

KYB Notification List:

- Displays **top 5 pending** KYB review requests
- Each item shows: business name, submission date, priority
- Click any item to navigate to KYB review queue

Charts:

- **Pie Chart** — Distribution of vendors by status (Active, Pending, Suspended)
- **Line Chart** — API traffic trends over time

Time Period Selector:

- Dropdown to filter dashboard data by time range (Today, 7 days, 30 days, 90 days)

3. KYB Review Queue

URL: `/Dashboard/Compliance&Approvals/KYB&GoLive`

Queue List View:

Column	Description
Business Name	Legal name of the applying business
Reference ID	Unique KYB application reference
Entity Type	Company type (Limited, PLC, etc.)
Risk Level	Badge: Low (green), Medium (amber), High (red)
SLA	Time remaining for review completion
Assessment Score	Compliance questionnaire score

Review Process:

1. Click **"Start Review"** on any queue item
2. **KYB Detail Modal** opens with sections:
 - **Organization Info** — company name, registration number, address, industry
 - **Business Documents** — uploaded documents with **download** buttons (certificate of incorporation, memorandum, board resolution)
 - **Bank Account** — settlement account details

- **Business Representatives** — director/shareholder details with ID documents
- **KYB Status** — current review status and history

Review Actions:

Action	Button Color	Requirements
Approve	Green	One-click approval, confirms KYB completion
Flag Request	Amber	Must select reason from dropdown + provide minimum 20 characters of instructions for the partner
Reject	Red	Must provide reason in textarea explaining the rejection

4. Vendor Management

URL: /Dashboard/Vendors&Partners/AllVendors

Vendor List View:

Column	Description
Vendor Name	Business name
Health Status	Service health indicator
KYB Status	Approved / Pending / Rejected
Creation Date	Date vendor was onboarded

Vendor Detail View (click row to expand):

Tab	Content
Overview	Company details, contact info, account status, subscription tier
API & Apps	API keys issued, active applications, rate limits, subscription products
Analytics	Transaction volumes, API usage charts, error rates, latency percentiles
Consents	Data processing consents, terms acceptance history
Audit	Complete activity log for this vendor — logins, API calls, config changes

Actions:

- **Suspend** button — immediately revokes API access, changes status to Suspended
- **Unsuspend** button — restores API access for previously suspended vendors

5. Other Admin Screens

5.1 User Management

Screen	URL	Features
Internal Users	/Dashboard/Users/InternalUsers	Admin team members, roles, last login, status
API Portal Users	/Dashboard/Users/ApiPortalUsers	Partner users registered through the portal

5.2 Roles & Permissions

- **RBAC Matrix** displayed as a grid
- Rows: roles (Super Admin, Admin, Reviewer, Viewer, etc.)
- Columns: permissions (View KYB, Approve KYB, Manage Users, View Analytics, etc.)
- **Checkboxes** at each intersection to grant/revoke permissions
- Changes saved immediately on toggle

5.3 API Catalog

URL: /Dashboard/ApiCatalog

- **Product Cards** displaying:
 - Product name and description
 - Usage metrics (requests, active subscribers)
 - Status badge (Active, Beta, Deprecated)
- **Category Filters:** Banking, KYC, Payments, Collections, Sandbox
- **"Create API Service"** wizard:
 - Step 1: Basic info (name, description, category)
 - Step 2: Endpoint configuration
 - Step 3: Rate limiting and access controls
 - Step 4: Review and publish

5.4 System Health

- **7 service cards** displayed in a grid layout
- Each card shows:
 - Service name
 - **Status badge:** Healthy (green), Degraded (amber), Down (red)
 - Last health check timestamp
 - Uptime percentage

5.5 Analytics & Compliance

Screen	Description
Commercial Analytics	Revenue metrics, transaction fees, partner billing summaries
SLAs & Breaches	SLA compliance tracking, breach notifications, penalty calculations
Audit Logs	Platform-wide audit trail with filters (user, action, date range, resource)

5.6 Settings

All Settings — displayed as a grid of setting categories:

Setting	Description
System Configuration	Platform-wide settings, feature flags, environment toggles
Security & Integrations	Third-party service credentials, webhook URLs, security policies
Manual Provisioning	Manually create partner accounts, assign products, generate keys
Developer Portal Settings	Customize developer portal branding, documentation links, API playground
Billing	Manage subscription plans and pricing

Billing Plans:

Plan	Price	Features
------	-------	----------
